

Better Data. Safer Schools.

SCHOOLS NEED

- An automated supervision system for school issued computers that safeguards students from cyberbullying, predators, self-harm and inappropriate websites, among other threats.
- A solution that teams with current content filters to provide knowledge of when and how users have compromised security.
- A solution that supports responsible computer use, encourages students to be on-task and provides administrators with the ability to uphold Computer Acceptable Use Policies.
- A solution that helps *comply with the FCC 11-125 order* requiring schools to *monitor* student use of computers.
- A solution that supervises the use of the whole computer not just social media.

LEARNSAFE DETECTS

- BULLYING & THREATS
- PORNOGRAPHY
- PREDATORS
- SUICIDE & SELF-HARM
- DRUG ISSUES
- GANG & WEAPONS VIOLENCE
- OFF-TASKING

What LearnSafe does unlike anything else.

MONITORS 24/7—ONLINE, OFFLINE, ON or OFF CAMPUS

Monitoring every computer in your school at all times ensures incidents are immediately discovered, both during lessons and outside of class.

REPORTS & PRIORITIZES INCIDENTS AUTOMATICALLY

Pinpoints and prioritizes the most serious safeguarding issues allowing teachers to focus on teaching rather than be responsible for monitoring students manually.

TARGETS ONLY INAPPROPRIATE BEHAVIOR

Detecting inappropriate content as it appears in the active window and denoting whether text is typed or viewed. This means LearnSafe supervises both desktop applications and internet activity, **not just social media**.

HIGHLIGHTS PROXY BYPASS USE

Captures evidence and reports when students bypass your content filter and reach blocked or banned websites.

CONTAINS ELEVEN PRE-DEFINED LIBRARIES

Includes a comprehensive collection of keywords and phrases associated with some of the greatest concerns and vulnerabilities facing K12 leadership.

ACTS AS AN EFFECTIVE DETERRENT

Because students know that inappropriate behavior will be detected at all times, LearnSafe provides a powerful incentive for them to take greater responsibility for their actions.

Mobile County Schools
CIO, David Akridge

"LearnSafe has given us a giant leap towards making a safer environment for kids and it's paid for itself by allowing us to remove some of our worst fears. I wish this type of software was available years ago as it might have made a difference in people's lives. It's important to get this technology in schools"

BETTER PROCESS

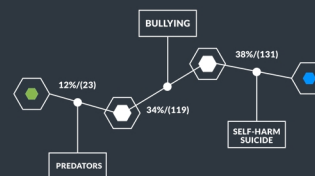

1. DETERMINE ACCEPTABLE USE

LearnSafe allows you to further define and reinforce the boundaries for acceptable use.

2. IDENTIFY RISK

LearnSafe detects and reports when students type or view unacceptable words and phrases.

3. REVIEW ACTIONABLE DATA

The LearnSafe reporting system allows you to easily review and prioritize triggered screenshots.

4. MANAGE BEHAVIOR

With LearnSafe you'll have clear data for intervention and be better equipped to promote desired behavior
